

Create 4Senses Chill-Out Spaces in:

Clinics, SPAs, Hotels, Nursing Homes, Fitness Centers, and other workplaces.

What is a 4Senses Chill-Out Space:

A personal immersive serenity space environment and atmosphere, where you take a pause ... breathe deeply, sit on a sonic ergonomic vibroacoustic therapy recliner and... *reset-reboot-recharge.*

As you enjoy soothing **tactile** inner body massage with sonic waves that rinse you from within, You **view** nature scenes on a large screen.

You **listen** to harmonic ambient music.

You **smell** and breathe in essential oil.

Hello from TheSoundWell Vibro-Therapy

Hi, I am Avigaili Berg – Wellness entrepreneur and the owner of TheSoundWell Vibro-Therapy.

We manufacture and assemble sonic ergonomic vibroacoustic therapy equipment such as mats and recliners. This is an amazing non-invasive sound healing wellness platform. It was invented by [Olav Skille](#) from Norway who was my personal mentor. Skille found the correlation between specific low sound frequencies and reduction of pain and stress in different parts of the body. Other frequencies help reduce insomnia and anxiety and boost vitality in a soothing way and comforting way.

Unlike mechanical massage chairs you find in airport and malls, inner body massage is soft & gentle yet vibrate organs, tissues and cells.
